Comments:

Comments: The UAA was conducted in July, 2005. Due to lack of access and steep slopes, only one site was evaluated. At the surveyed site, no WBCR was observed and water depth did not meet the maximum or average depth criteria. Because of the overall shallow depth of the stream, and the lack of access, the committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
